Fresh Graduate in Information Technology with experience in web application development and testing through academic projects and internship programs. Knowledgeable in the Software Development Life Cycle (SDLC), system requirements analysis, functional testing, bug identification, and feature validation to ensure compliance with business requirements. Experienced in collaborating with cross-functional teams throughout the development process, bug fixing, and application quality evaluation. Detail-oriented, possess strong problem-solving and communication skills, a high willingness to learn, and enthusiastic about pursuing a career as a Quality Assurance Engineer.

Pengalaman Kerja

PT. Alfahuma Rekayasa Teknologi - Malang

Sep 2024 - Dec 2024

Junior Frontend Developer

- Developed and implemented web application features based on user needs and project requirements.
- Developed and maintained internal web applications using Vue.js and Tailwind CSS.
- Integrated frontend applications with backend APIs to display and process data dynamically.
- Collaborated with the development team in feature design, testing, and bug fixing to improve application quality.
- Selected as the MSIB Batch 7 Tribe Lead, responsible for coordinating participants, communicating program updates, and serving as the liaison between participants, mentors, and facilitators.

Jenang Pendidikan

Universitas Brawijaya - Malang, Indonesia

Aug 2022 - Nov 2025

Diploma, 3.91/4.00

- Built and tested full-stack web applications using Vue.js and Laravel through project-based learning.
- Analyzed business requirements and validated application features to ensure they met functional requirements.
- Designed and executed manual test scenarios and functional test cases during the development process.
- Identified, documented, and collaborated with team members to resolve application bugs and improve software quality.
- Collaborated with cross-functional team members throughout feature development, testing, and bug verification.
- Developed the frontend and backend of the Washnjoy web-based e-laundry application.
- Developed the backend and designed the database for the SIMAPRES academic information system.
- Participated in the Certified Independent Study and Internship Program (MSIB) Batch 7 as a Frontend Developer.
- Served as the MSIB Batch 7 Tribe Lead, coordinating participants and facilitating communication between participants, mentors, and facilitators.

Project dan Volunteer

Admission Web Weekendplan

Mar 2025 - Jun 2025

Fullstack Developer (Final Project)

- Analyzed system requirements based on the business process of the Creative Class admission system.
- Designed and validated the workflows for registration, attendance, transactions, and the admin dashboard to ensure alignment with business requirements.
- Performed manual functional testing on registration, login, class enrollment, attendance, transaction, and admin dashboard features.
- Identified, documented, and verified bugs, ensuring implemented fixes met functional requirements before deployment.
- Validated application features to ensure functionality, usability, and data processing worked as expected.
- Collaborated with team members throughout feature development, testing, bug fixing, and quality improvement.
- Developed end-to-end web applications using Vue.js for the frontend and Laravel for the backend.
- Integrated frontend applications with backend APIs using Axios for real-time data exchange.
- Developed an admin dashboard with CRUD functionality to manage classes, users, and transactions.

Project Manajemen Web

Nov 2024 - Dec 2024

Frontend Developer (MSIB Batch 7 Final Project)

- Analyzed feature requirements and implemented user interfaces using Vue.js and Tailwind CSS.
- Designed user interfaces in Figma and translated designs into reusable frontend components.
- Verified that implemented features matched functional requirements and approved UI designs.
- Performed manual testing to validate feature functionality, UI behavior, form validation, and user workflows.
- Identified, documented, and collaborated with team members to resolve UI issues, functional defects, and data validation problems.
- Integrated frontend applications with backend APIs using Axios to ensure accurate data exchange and application functionality.
- Collaborated with cross-functional team members throughout feature development, testing, and bug resolution to improve application

quality.

- Monitored project progress and ensured assigned features were delivered according to project requirements and timelines.

MSIB Batch 7

Sep 2024 - Dec 2024

Tribe Lead — MSIB Batch 7

- Served as the primary liaison between internship participants, mentors, facilitators, and program organizers.
- Coordinated communication and ensured timely dissemination of program updates, schedules, and announcements to tribe members.
- Maintained documentation and prepared periodic reports on weekly progress, team activities, and discussion outcomes.
- Assisted in resolving administrative and communication issues to ensure the smooth execution of program activities.
- Facilitated collaboration and coordination among team members to support project completion and achieve program objectives.
- Demonstrated strong communication, organizational, and problem-solving skills while managing multiple responsibilities and meeting deadlines.

Washnjoy — Web-based E-Laundry Application

Apr 2023 - Jun 2023

Fullstack Developer

- Analyzed business requirements and designed application workflows for laundry order, payment, and service management.
- Developed full-stack features using Laravel, HTML, and Tailwind CSS.
- Designed and managed the MySQL database to support application data processing.
- Created and executed manual test scenarios to validate application features and business workflows.
- Performed functional testing on order management, payment, and status tracking features to ensure compliance with business requirements.
- Identified, documented, and resolved defects, then verified fixes before deployment.
- Collaborated throughout the development lifecycle to improve application quality and user experience.

SIMPRES — Web-based Student Achievement System

Oct 2023 - Dec 2023

Back-End Developer

- Analyzed system requirements and developed backend features for managing student achievement data and submission workflows.
- Designed and managed a structured database to support student records, achievement data, and validation status.
- Built RESTful backend services using Native PHP to handle CRUD operations and business logic.
- Integrated backend features to support achievement submission and validation processes.
- Performed functional testing and validated backend functionalities to ensure they met system requirements and business rules.
- Identified and resolved defects during development to improve system reliability and functionality.

Yuwaraja XV

Aug 2023 - Dec 2023

SPV

- Mentored and guided new students throughout the faculty orientation program, ensuring they understood the schedule, activities, and procedures.
- Coordinated with organizing committee members to ensure activities were executed according to the planned timeline and objectives.
- Served as the primary point of contact for participants by providing information, addressing inquiries, and resolving issues during the program.
- Monitored on-site activities and collaborated with the team to ensure smooth execution of all program sessions.
- Demonstrated strong communication, coordination, and problem-solving skills while managing multiple responsibilities in a fast-paced environment.

OSIS SMAN 1 Kauman

Aug 2020 - Aug 2022

CO Sekbid

- Coordinated the planning and execution of division work programs and activities.
- Led and supervised team members to ensure assigned tasks were completed effectively and project objectives were achieved.
- Prepared project timelines, budgets, and post-event reports to support effective activity management.
- Collaborated with the Student Council board and school representatives to organize and successfully deliver school events.
- Served as the liaison between division members, the Student Council President, and faculty advisors to ensure effective communication and coordination.
